Technology is no longer only for computer science majors and mathematicians but our everyday life. Being a passionate people-person with over 10 years of experience as a professional dancer and in the hospitality industry; bringing tech and communities together is a dedication of mines. After a year and a half sabbatical, wire jewelry making and briefly attending Dev Bootcamp, I attended and graduated from Epicodus. There I spent six months coding over 1000 hours and built web applications from scratch. Now, after finishing my internship I am enthusiastic to bring my development skills to your team/company.
