Skills

HTML

CSS

Javascript

JQuery

Angular 2

SQL

My new pursuit in coding has both a professional and personal goal. Professional, I would like to be part of this ever growing field. Technology is no longer this thing only for computer science majors and mathematicians but our everyday life. On a personal level I would love to get into combining technology and dance. Specifically with drones. I want to create dance pieces were the dancer and drone dance organically to together.

Experience

2017-08 - 2018-02
